

	Butterfly Morph–Thor Myhre	
sculpture	Medium–Multimedia	\$2,500
	<p>Myhre collects “discarded treasures”, (found objects). When he found two tractor fenders he decided they would make great wings, and the rest of the sculpture grew from there. Myhre uses contrasting shapes (some curvy, some straight), sizes (some thick, some thin), and materials (some metal, some wood) to provide interest. It takes a long time to put just the right pieces together to form the final sculpture. Imagine putting found objects together. What sorts of materials would you use?</p>	  <p>GPS coordinates: N 47° 40' 43.7" W 122° 07' 43.2"</p>
